Jinu Kim

Vulnerability Researcher @uz56764

kimjw04271234@gmail.com

I research vulnerabilities in system software and large-scale infrastructure — browsers, kernels, hypervisors, cloud platforms, and databases.

Introduction

I research vulnerabilities in system software such as browsers and hypervisors. In Google Chrome, I have reported two full-chain exploits that include a browser sandbox escape, one of which earned a $250,000 bug bounty. In Linux KVM, I found a guest-to-host VM escape (CVE-2026-99082) and submitted it to kvmCTF. I have also found multiple remote code execution bugs in Cloudflare Workers and MongoDB, and ranked #1 on the 2026 HackerOne Korea leaderboard.

I started with CTFs in high school and have reached the DEF CON CTF finals three times. I am currently studying at the KAIST School of Computing. I am interested in both AI for security research and the security of AI systems.

Vulnerability Research

Google Chrome

- ◆ **Full Chain Exploit #1** — $250,000
- ◆ **Full Chain Exploit #2**
- ■ Browser Sandbox Escape ×4
  #559115426 #572288856 #572401251 #573174984
- ■ V8 Heap Sandbox Escape ×2
  #488927521 #560771373
- ■ Blink
  #573335176 v8CTF 0day submission

Other reports

Linux KVM

- ◆ CVE-2026-99082 **VM Escape** — $-
  kvmCTF Full VM Escape
- ■ CVE-2026-98164 Guest to Host Panic — $-
  kvmCTF Host Panic

Cloudflare

TOTAL $40,000

- ■ Workers Remote Code Execution ×2
- ■ cloudflare/workerd Remote Code Execution ×6

Other reports

MongoDB

TOTAL $30,000

- ■ Remote Code Execution ×7

Other reports

MariaDB

- ■ Remote Code Execution

Envoy Proxy

- ■ CVE-2026-73550 Unauthenticated Remote DoS

Chia Blockchain Network

- ■ Vulnerability Reports

Experience

Sep 2026 – Present

Team Lead, Security Engineer

EUCLIDSOFT

Vulnerability analysis and development of AI security products.

Jul 2026 – Aug 2026

Independent Vulnerability Researcher & Bug Bounty Hunter

Independent

Vulnerability research across browsers, kernels, cloud infrastructure, and databases, including open-source research and exploit development. Ranked #1 on the 2026 HackerOne Korea leaderboard.

Dec 2024 – Jun 2026

Cyber Operations Specialist

Cyber Operations Brigade, Republic of Korea Army

Analyzed web and software vulnerabilities and validated real-world attack scenarios on red team missions.

Projects

LLM orchestration for vulnerability analysis

An LLM-orchestrated analysis workflow that identified a memory disclosure bug in zlib.

LLM orchestration for CTF challenges

Before general-purpose coding agents were common, a main/sub-agent system on LangChain and LangGraph that combined tool calls, web search, and brainstorming-style reasoning to solve CTF challenges.

Selected Awards

2026	1st	CCE 2026 Final, Overall		₩40,000,000
	1st	Dreamhack Invitational 2026 Qualifier	International	
	1st	CCE 2026 Qualifier, General Division		
	3rd	Codegate CTF 2026		₩5,000,000
	Finalist	DEF CON CTF 2026	International	
2025	1st	CyKor CTF 2025	International	$3,000
	1st	FIESTA 2025 Financial Security Threat Analysis		₩4,000,000
	1st	CCE 2025 Qualifier, Public Sector		
	1st	WhiteHat Contest 2025 Qualifier, Soldier Track		
	1st	ACDC 2025 Qualifier, Student Division		
	1st	KoS CTF 2025		
	2nd	CCE 2025 Final, Public Sector		₩6,000,000
	2nd	WhiteHat Contest 2025 Final, Soldier Track		₩3,000,000
	3rd	HackTheon Sejong 2025, Advanced Division	International	₩5,000,000
	3rd	corCTF 2025	International	$1,337
	4th	LG U+ Security Hackathon 2025		₩3,000,000
2024	1st	LG U+ Security Hackathon 2024		₩10,000,000
	1st	Chungcheong Regional Cybersecurity Competition 2024		₩3,000,000
	4th	DEF CON CTF 2024 Final	International	
2023	1st	WhiteHat Contest 2023 Junior Final		₩6,000,000
	1st	WhiteHat Contest 2023 Junior Qualifier		
	1st	WACON 2023 Junior Qualifier		
	2nd	WACON 2023 Junior Final		₩3,000,000
	2nd	CCE 2023 Final		₩2,000,000
	7th	DEF CON CTF 2023 Final	International	
2022	2nd	WhiteHat Contest 2022 Final		₩4,000,000
	2nd	JBU CTF 2022		
	Finalist	Codegate CTF 2022 Junior		

Education

Feb 2024 – Present

School of Computing

KAIST

Jun 2022 – Mar 2023

Best of the Best, 11th cohort

KITRI

National training program for next-generation security specialists.
